Claim Rejections - 35 USC § 103

1. Claims 1-3,6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chachques (2002/0124855) in view of Heynen et al (6,507,756).

In addition to the comments made in the previous office action, Chachques teaches a implantable device used for stimulating implanted cells in a patient's heart to 'facilitate synchronization of the transplanted cells', par. 19. Heynen teaches, among other things, stimulating the patient's heart such that the Av delay is progressively decreased to 'remodel' the patient's heart, so 'that the muscle cells of the heart can adapt to the new situation of different wall stresses, volume loading, and/or contraction patterns', column 5 of Heynen. Additionally, combining the teachings of Chachques and Heynen would have been obvious since such would be a combination of known prior art elements yielding a predictable result. The result being a pacemaker which is capable of adjusting the AV delay by a predetermined amount over a predetermined time. Re claims 6-10, sensors which can sense activity, stress, etc are included in the device of Heynen, and the device is also capable of be 'programmed' by a programmer, as is known in the art. Re claims 2,3 many mode can be programmed into the device of Heynen, including a VDD mode, if desired, and well as the ability to defibrillate the patient.

2. Claims 4,5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chachques (2002/0124855) in view of Heynen et al (6,507,756), and further in view of Bonnet (6,574,507).

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
